# My Book Of Sentences

## Synopsis

This sequel to My Book of Simple Sentences aims to help children understand slightly more complex sentences. Adjectives are slowly introduced in pairs, allowing children to create complete sentences such as ""the happy cat eats." Ages 6-8

## Customer Reviews

I just brought this book for my 7 yr old that is building his skills on writing sentences independently. We also own the My Book of Writing Words: Learning about Consonants and Vowels (Kumon Workbooks) and My Book of Simple Sentences: Learning about Nouns and Verbs (Kumon Workbooks). Although this book is recommended after the other two, I am actually going to use this book first, then the "Writing Words", and then the simple sentences. The nouns in this book are a mixture of long and short vowels, but one syllable words. It also contains a lot of the helper adjective words that are in the Dolch list (eg. big, little, short, long, etc). The "Writing Words" book contains a lot of blend sound words, but no helper words or sentences. The simple sentences book has only nouns and verbs in the sentences, but the nouns are more complex: eg. kangaroo. I give all three books 5 stars. I just disagree with the order that Kumon recommends.

Parents need to be aware that this book is strictly copying very simple sentences and nothing else. Since this book is labeled for ages 6-8, I thought that this book would teach students to build more

complex sentences by learning to add adjectives and fancier predicates in a step by step way. It's not even great for handwriting practice because the lines are small and of differing sizes. What a disappointment.

I bought this Kumon book for my 5-year old twins to practice their sentences. One disappointment is that it does not have rip-out pages, but you might not want that anyway. Another disappointment is that the spacing for practicing writing is not uniform in size... some pages have nice large lines to write in, others have smaller areas to write, which are really a little too small for this age to work with. Otherwise, the book is good.

I needed extra math and reading/writing practice for my kids in 3rd and 1st grade. These books are easy to understand, very systematic and kids love it. we take them along in the car even for short drives. It keeps the kids busy in the back seat. would recommend these to any parent that would like their child to excel academically. who doesn't?? I've purchased about a dozen plus Kumon books from already and intend to purchase many more.

This is a great learning and practicing book. It has just the right amount of difficulty for the grade level chosen. What is great about it also is that it is easy to find parallel subjects to whatever your child is learning in school..Comes with answer key that allows you to go back and review wrong answers. The stories for the reading comprehension questions are good too.

as a grandfather teaching a child with some learning disabilities these books have helped and continue to help on a great degree, i am thankful for this company and all they do to help children...these books are great for school children when there is no school and you want to keep their brains working....

I have been happy with all of my Kumon purchases! They are great supplemental guides or summer bridge books. They are fun and help to break down concepts to more manageable bites of understanding. I highly recommend for homeschoolers or for mom's who simply want to supplement their children's normal school curriculum.

I brought My Book of Sentences for my 5 yr old to help supplement what he was learning in school about writing sentences. It was exactly what I needed. It was easy to use, and simple enough for a

child to follow along. It helped build his confidence, which is exactly what we needed. When it comes to making the selection on which book to use, I recommend you go with your child's abilities instead of the recommended age for the book.
