Comic Book Math ~ Fun-Schooling Journal: Adding, Writing & Subtracting Games (Ages 6 To 11)

Synopsis

This fun math book is inspired by Minecraft and Legos! Creative kids love this book! Fun "Do-It-Yourself" math practice that helps children to overcome foundational math problems! Spark a love for numbers with a fun learning book inspired by Legos, Minecraft, comics, robots, and adventure play! This book is perfect for Struggling Learners and Beginners ages 5 to 11 Is your child burnt out on Math? "If a child does not learn the way we teach, we must teach the way they learn" This Fun-Schooling Math and Writing Journal is packed full of fun activities to help children learn! They will enjoy Lego & Minecraft inspired activities while they practice the skills they need to add, subtract, calculate, use logic, create comics, draw, write, and use their imaginations. This book is geared toward beginners as well as older children who struggle with basic skills or need to practice their math and writing while having fun. The math is not difficult or confusing. If you have a child who dislikes math, try this to spark a new love for numbers. Revised and updated April 2016 - NEW "Make Your Own Comic" Activities! The characters in the book are fun and will remind your child of playing with Legos, robots, Mine-craft, pets, friends! There are over 100 activities, games, and practice pages in this book to help your child learn. Be sure to spend time teaching your child when he needs help. Some games are designed for TWO people to play together. Almost all the activities are Logic-Based, that means that your child may not need very much help figuring out what to do on each page. The book is best for ages 6 to 11. Many of the games from "The Littlest Math book" are found in this book, but this is a much bigger size. This book has wide margins and extra white space so your child will have lots of room to draw and doodle while figuring out the math mysteries! This book is designed to work well for Visual Thinkers and children with ADHD, Asperger's and Dyslexia. It is important for parents and teachers to understand that creative children need white space so they can work out their problems. this book offers a lot more creative freedom than any other math book on the market. The goal is to inspire your child to find joy in numbers, writing, logic, drawing and creativity. While your child delights in this fun method of learning, he or she will be practicing basic math skills. You may have a children who is older, but never really grasped the meaning behind the math. They might be offended by workbooks that are babyish - but this one is FUN! This book always connects math with meaning so your child can apply mathematics to real life. We want each student to develop strong thinking skills, not just to be able to memorize and repeat facts. We want each student to love learning and experience the joy of curiosity, discovery and creativity as part of their educational journey. Customer Reviews

What is this? It's a math comic journal to work on math facts and learning. What this isn't? It's not your everyday math workbook. There is not pages of questions, there is not loads of math facts, in a sense it is simpler. Who it would work well for? I don't want to give an age because it depends on your child. Some kids can take on math facts so fast that they finish notebooks in days, other kids struggle with math facts and have been tempted to rip apart their math book and throw it away. If your kid is a math wiz in grades 1-5 then you may not appreciate what this book offers, but if math is hard, if your child hasn't had a chance to memorize addition facts, if you have a kid who still counts on their fingers, then this book WILL be helpful. It will be helpful if your child has learning struggles, dyspraxia, ADD, struggles to memorize. But know your child. When you ask your child addition facts and subtraction facts do they understand? Can they give answers? Even if you have spent years on it? Do they stress out about the answer and benefit by learning with the answer? They may love the blocks of 4 that have addition and math facts, with pictures. In a sense you could say this is a therapy workbook, it helps your child go over the 'easier' math facts in different ways, with pictures. It presents them information that helps them 'get it'. This book has the squares (as I call them) of math problems (16/page, 4/square) with pictures of creatures in them, there are pages for the child to present their own questions for their parents. The back has blank pages to write about the characters. (The book has block figures similar to Lego, minecraft...
