Customer Reviews

I homeschool two boys and we have previously used the Spectrum series of workbooks for math. The Good This book is colorful and well laid out. It is easy to understand as it provides clear, easy to follow examples using relatively large font size for this type of workbook. The Bad Each lesson really only comes with a few practice problems. We were disappointed with the amount of practice this book provides. Further, the pages are not perforated which makes it more difficult to tear them out, the Spectrum workbooks we have used are perforated. Summary I am a big believer in

practice makes perfect and this workbook just does not cut it when it comes to providing enough practice questions. I also like to tear the pages out to prevent my boys from looking at the answer sheet while doing their daily work, which this book makes difficult. I will definitely not purchase workbooks from this publisher again in the future. I will likely go ahead and order the Spectrum series again and consider this a lesson learned.

This book is fantastic for homeschoolers. My 4th grader needs a lot of love in math. It starts out hard but its math and math is always only as hard as you make it. This book is thorough and the answer guide in the back is a must for me.

This is a very good book to keep your child's brain active during the summer months. My daughter does a few pages everyday and never complains.

I like the layout of this book. I homeschool and am using this series to bring my son up to speed in math. He likes it much better then previous large daunting textbook.

I still have to use it for my 4th grader next school year but my initial expectation is good just like the 3rd grade text book i got previously.

Excellent. I teach sped resource math and these pages give the kids notes to reflect back on and then I easily found practice work for each lesson.

I use this to tutor kids who need a review or reteach of concepts. I like the colorful presentation and they are easy to read.
