Grade Level: 6 and up

Customer Reviews

This is a great learning book but difficult for kids that have never done this kind of work before. I bought this for my 5th grader that I homeschool and she is having a hard time with the processes they want her to do but we are working through it hopefully by the end of the book she will have grasped the methods they use.

Its very useful... my kid's skill in solving the word problem is now greater than before...

Great book that compliments 6th grade "Singapore" math program

Just what the Dr ordered to refresh my math skills.
